

PiSYS

Creative Technical Solutions

is a generic database system for the management of audits and inspections relating to any type of asset or process. It facilitates audit methodology with comprehensive capabilities for the creation and maintenance of hierarchical checklists, entry of audit findings, creation of audit progress reports, corrective action requests and other management functions. The software is web-enabled, allowing access and input from a distributed team on large audits. The software runs on Windows 95/ 98 and NT operating systems.

- The system is designed in a three tier layout, to give ease of use and optimum visibility
- Audit Manager produces Word™ formatted, CARs, Non-Conformance Reports, Audit Summary, Full Audit Reports
- Attachments can be added to any of the reports; photographs, sound files, asset drawings, video clips
- Measurement standards can be predefined. They can be linked to the audit item, when required, to give a complete work instruction.
- The system uses password-controlled levels of security.
- Any authorised 'View-Only' user can log onto your Audit Manager database from anywhere in the world.

Audit Manager Benefits

- ✓ Better control of complex audit and inspection programmes
- ✓ Faster and more reliable collation and reporting of audit findings
- ✓ Improved audit team collaboration through intranet/ extranet access
- ✓ Reduced time and costs through improved efficiency and productivity
- ✓ Assured audit acceptability and authority with quality system methodology
- ✓ Quality and consistency through standard procedures and checklists
- ✓ Streamlined workflow by elimination of repeated information handling
- ✓ Shorter time to close-out of corrective actions through CAR tracking
- ✓ Gain extra insights by keeping past audit histories in one database

Saves Time & Money

- ✓ The library of audit programmes can be updated and issued quickly.
- ✓ Audit data entry is fast and concise.
- ✓ Reports are automatically produced.

Builds Quality into your process

- ✓ Structured, configurable checklists reduce ambiguity and ensure that you gather the data you need.
- ✓ Ensures all audit tasks are completed and Corrective Action Requests are progressed.
- ✓ Audit trails are maintained for changes to the audit programme and on all audit data entry.

Key People are better informed

- ✓ Managers, Quality Personnel have relevant data on the assets being audited.
- ✓ Interim reporting promotes rapid reaction to non-conformances...
- ✓ Audits and asset data is available on the internet for remote access
